lucipc@gmail.com

I'm a front end web developer and designer from California, now based in the Scottish Highlands. I design clean, functional and elegant solutions in the form of websites, web apps and digital graphics. My web creations work beautifully on all devices and modern browsers, while the visuals have proven to increase engagement and conversion.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript ES6, Sass, jQuery

Tools: Magento CMS, AWS, Google Analytics, Google Tag Manager, Photoshop

EXPERIENCE

Jan 2017 - Present: Manager & Graphic Designer, In The Mix (Part-time)

- Assisted creator in managing relationships with brands, clients and viewers
- Designed consistent and engaging YouTube marketing and brand assets that have noticeably increased and improved viewership over time
- Advised creator on effective content creation and professional image

April 2019 - Oct 2020: Front End Support Engineer, Promenade Group Inc.

- Utilized heavy CSS and HTML within the Magento CMS to customize front-end web designs for hundreds of e-commerce sites in the floral and beverage industries
- Managed a high-volume pipeline of new website designs and tasks with efficiency and speed
- Collaborated with Account Executives and Implementation Associates to identify the most aesthetic and intuitive front-end designs for new accounts as they onboard
- Managed DNS in AWS and Magento in order to launch and maintain client website hosting
- Collaborated with Account Managers to manage and make adjustments to existing websites to improve design and SEO throughout their entire lifetime as an account with the company

PROJECTS

SunShy: A JS app that helps you protect your skin from the Sun's harmful rays

- Web app developed mobile-first from scratch with HTML5, CSS3, Sass, JavaScript, npm, Babel and Webpack (<https://lucciwynne.com/sun-shy>)
